

Luxurious Modal Robes

Modal is 100% natural and made from wood pulp cellulose from the beech tree. The cellulose is extracted from indigenous woods, and the pulp and fiber production are conducted through sustainable practices.

Superior absorption: Modal absorbs 50% more moisture than cotton, dries faster than cotton and is soft to the touch. The fiber can be safely washed and dried in standard washers making it an "easy care" fabric.

Unmistakable softness: This super sumptuous spa quality Modal robe epitomizes pure luxury and next to skin softness.

Available in hooded and kimono styles
