

Modal Towel Collection

Koni Eco Towels constructed with Modal fibers are manufactured to exceed the industry specifications for absorption, durability and guest satisfaction. These products will maintain their original beauty for a long period of time if cared for properly. Please follow these instructions carefully.

DO'S

- Wash and dry in cool temperature (washing in hot water is acceptable, not to exceed 95°F (35°C). A higher degree of shrinkage may result)
- Wash with mild surfactant detergent.
- Use gentle cycle in washing and drying
- Wash and dry separately from other textile
- Check for burrs inside the washing machine and dryer periodically and smooth out the roughness inside the machines before putting in any Heavenly products
- Test ONE set in a washer and dryer for a satisfactory result. Proceed with others when the test result is satisfactory. (Koni Hospitality will be responsible for one test set only, if an unsatisfactory result occurs)

DON'TS

- **DO NOT** use HOT water exceeding 95° (35°C)
- **DO NOT** use HOT dryer temperatures exceeding 95°F (35°C)
- **DO NOT** use Alkaline detergent
- **DO NOT** use chlorine bleach
- **DO NOT** use fabric softener in either the washing or drying cycles
- **DO NOT** mix with any other textile
- **DO NOT** use washing machines or dryer with burrs inside

Koni PreClean Spot Remover

Apply Koni PreClean Spot Remover to the spot and gently rub it into the fabric. Allow it to stand for 10 minutes. Hand wash the spot in lukewarm water, then follow the washing and drying instructions. Most of the stains will be removed with this application, but if you run into a stubborn stain, brush lightly after applying PreClean and repeat the process.
