

Branded Beautifully, Inspired Naturally

Duvet Covers, Bed Skirts, Bed Scarfs and Pillow Covers

Koni Duvet Covers, Bed Skirts and Pillow Covers are made with a combination of Polyester, Polyester blend and Polyester Suede. While these fabrics look and feel luxurious, they are also durable and washable. If these instructions are carefully followed, these fabrics will maintain their original beauty for a long period of time.

DO:

- Wash and dry in warm temperature not to exceed 120°F (50°C).
- Wash with mild surfactant detergent.
- Use the gentle cycle for washing and drying.
- Use Koni PreClean spot remover for small stains. (See below for information)
- Wash and dry separately from other textiles.
- Close all zippers before washing.
- Check for burrs inside the washing machine and dryer periodically and smooth out the roughness inside before putting in any other items.
- If there are any burrs inside the washing machine and dryer, put the duvet covers, bed skirts and pillow shams inside a mesh bag before washing or drying.
- Remove all items from the washer and dryer as soon as the cycle is over.
- Test ONE set in the washer and dryer. If the result is satisfactory, proceed to wash and dry the others sets. (KoniHospitality is responsible for the test item only, if an undesirable result occurs.)

DON'T:

- **DO NOT** use HOT temperature in dryer exceeding 120°F (50°C).
- **DO NOT** use alkaline detergent, chlorine bleach or hydrogen peroxide
- **DO NOT** use sour (acid).
- **DO NOT** use solvent for stains.
- **DO NOT** use fabric softener in either the washing or drying cycles.
- **DO NOT** mix with any other textile.
- **DO NOT** leave the zippers open.
- **DO NOT** use washing machines or dryers with burrs inside.

SPOT REMOVER:

Apply Koni PreClean spot remover to the spot and gently rub it into the fabric. Let it sit for 10 minutes. Hand wash the spot in lukewarm water, or use wet cloth on the spot or wash as instructed above. For stubborn stains, brush lightly after applying the spot remover and repeat the process.

NOTE: Ironing is not necessary if the above instructions are followed. Avoid HEAT, CHLORINE and FABRIC SOFTENERS. They are the fabrics worst enemies.
